REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The closest prior art is WO 99/42282, particularly at page 17, 2nd paragraph where it is taught that "liquid delivery MOCVD....may be carried out with the introduction of the precursor reagents to the vaporization zone of the process system in combination with one another, or separately". Depending upon the interpretation of this passage, "in combination" could suggest providing a premixed solution from a source reagent ampoule, although this is not explicitly taught. However, in view of the applicants' discovery that delivering the precursors from a premixed solution thereof results in better run to run repeatability than providing them separately (instant specification at page 8, lines 19-29), which result is certainly not taught or fairly suggested by the prior art, the prima facie case of obviousness is overcome in view of the unexpected benefit derived from providing the precursors premixed in a solution from a source reagent ampoule.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
